

ANCILLARY

IFD-MB

Adjustable Mounting Bracket

Features

- ▶ Stainless steel (304) construction
- ▶ Adjustable, horizontally and downwards by 45°, left or right by $\pm 45^\circ$
- ▶ Fixing holes allow for mounting onto walls or Unistrut

Description

The IFD-MB is a stainless steel, robust mounting bracket that can be used to mount the IFD-E and IFD-E-IS industrial flame detectors.

The bracket adjusts through two planes to allow precise positioning of the detector in relation to the area to be covered.
