DEVICE ADDRESS PROGRAMMER

Features

▸ Lightweight design
▸ Quick and reliable addressing
▸ Over 8000 address settings from one battery
▸ Displays sensor analogue value
▸ Ability to disable polling of sensors.

Description

Model TCH-B200 is a hand held address programmer designed to address the ESP range of Sensors and all other addressable devices such as wall sounders, mini modules and manual call points (with the use of a programming lead – sold separately).

The unit is designed to be light, robust and easy to use and operates from a single PP3 size battery, which gives the capacity for up to 8000 operations. The programmer is also capable of displaying the sensor analogue values.
